Kitchenaid glass stove top cover

© 1996-2014, Amazon.com, Inc. or its affiliates Every bargain hunter knows that the search for the perfect 2nd hand stoves begins with knowing your appliances, your space and what you expect from your "new-to-you" appliance. Check out this guide to buying a secondhand stove, and get a great deal on that unforgettable Blaze King Princess stove. Set up for Your Signature Style Before you begin your search for the perfect secondhand stove, take a minute to measure the space you've cleared for the purchase. While an antique stove company might have a secondhand stove that's over 50 inches wide, many modern woodburning stoves are only 30 inches wide or even narrower to conserve space. Keep in mind that your secondhand stove needs to fit your home's space and provide all of the necessary heat you're expecting. Check out the Pacific Energy stove prices and compare them to 2nd hand stoves like the Big Moe from the All Nighter Stove Company. Depending on your budget, you might find a favorite woodburning stove that dates to the 1970s or something a little more aged with a preferable price. Secondhand stove styles vary greatly with pricing beginning at less than \$100 and topping out at tens of thousands of dollars. Use your research to determine which stoves fit your budget and your style. Shop Online to Find Great Deals Your secondhand stove search begins once you've determined the size, style and price you love. Check out online shopping sites and auction pages to get a glimpse of the stoves that suit you. Buck Stove dealers carry new stoves while auction sites like eBay and sales pages like Craigslist offer deals on used versions. Use the Internet to your advantage by shopping local auction sites to save big bucks on shipping charges, or find the best bargain by checking for secondhand stoves across the United States. Keep in mind that a great purchase price might be overshadowed by outrageous shipping charges. Always factor shipping into your purchase. Get Advice from the Experts People who run local auction houses, owners of businesses that collect and sell antique appliances and even tradespeople who repair woodburning stoves are definitely great resources when it comes to finding your favorite secondhand stove. Use the local knowledge to your advantage as you search for the perfect addition to your home heating appliances. Don't be Afraid to Haggle the Deal A secondhand stove, like any secondhand appliance, is usually posted for sale with a little wiggle-room when it comes to pricing. One of the fun parts of shopping for a secondhand stove is learning the art of haggling. Negotiating the deal means searching those 2nd hand stoves for superficial imperfections that might allow for a price drop. Ask about discounts for paying with cash or negotiate a free delivery or installation to make the most of your secondhand stove purchase. Trying to get a great deal is a part of the joy of buying a secondhand stove. MORE FROM QUESTIONS ANSWERED.NET You're visiting the PartSelect site in U.S. Would you like to shop on the Canadian site?
